REDVIVE / RED + NEAR-INFRARED LIGHT

A different kind of *glow for your feet.*

A brief, noninvasive light session designed to complement your personalized pedicure experience.

A THOUGHTFUL ENHANCEMENT

Meet RedVive

Photobiomodulation (PBM) uses selected wavelengths of red and near-infrared light.

ADD-ON LIGHT SESSION

$30 / 15 MINUTES

Available with eligible pedicures. Included in our $129 Neuropathy Pedicure.

PRIVATE NAIL CARE / ONE GUEST AT A TIME

A little light. A considered ritual.

What to know about PBM and how to add it to your visit.

THE EXPERIENCE

What is PBM?

Photobiomodulation uses specific wavelengths of light delivered to the body. RedVive combines visible red and near-infrared light.

At Adobe Wellness, this is a short, optional wellness enhancement, not a medical treatment.

15-MINUTE SESSION

No invasive steps. Just light.

HOW YOUR SESSION WORKS

01 Check suitability
Share relevant health concerns before your session.

02 Settle in
The panel is positioned and appropriate eye protection is used.

03 Carry on
Your experience may vary; benefits are not guaranteed.

CHOOSE YOUR EXPERIENCE

PBM ADD-ON

15 minutes — $30

INCLUDED IN

Neuropathy Pedicure — $129

BEFORE YOU BOOK

Tell us about pregnancy, photosensitivity, medications, eye conditions, implants or other health concerns. PBM has no guaranteed benefit, does not repair nerves or treat neuropathy, and is not a substitute for medical care.
